Kharkiv Green Urban Fest 2023

On June 17, 2023, Kharkiv Green Urban Fest 2023 was held at the Yermilov Center of Karazin University as part of the international research project Fusilli (Fostering the Urban Food System Transformation through Innovative Living Labs Implementation). This project has received funding from the European Union's Horizon 2020 research and innovation program under grant agreement №101000717.

Everyone had the opportunity to take part in a workshop on growing microgreens from the NGO Green Land. Also, 50 kits for growing microgreens at home were distributed. The main goal is to build a quality food system in Kharkiv, so these kits are the first step towards a greener future. This is especially important for implementing the strategy of the UN Sustainable Development Goals.

All-Ukrainian Mental Health Program "How are you?"

According to sociological surveys, more than 90% of Ukrainians have experienced at least one of the symptoms of anxiety disorder, and 57% are at risk of developing mental disorders. Ukrainians are not in the habit of seeking professional help: 31% of citizens do not consider their problems sufficient to do so. This is currently the main barrier to seeking psychological help.

The All-Ukrainian Mental Health Program "How are you?", initiated by the First Lady of Ukraine Olena Zelenska, aims to help Ukrainians find a source of strength. The source is internal, in oneself, at the level of awareness and recognition of one's own mental state and at least an approximate assessment of the degree of its crisis. Taking care of mental health should become a habitual responsibility of everyone.

World Health Day: the University celebrates

World Health Day is celebrated annually on April 7. The holiday was established in 1950, and the date of the celebration is dedicated to the day of the adoption of the World Health Organization's Charter in 1948.

Each year, the World Health Organization determines a specific theme for the holiday. In 2023, it is "Health for All". After all, everyone has the right to receive the services they need for health reasons. Healthcare services must guarantee equal access to healthcare for all without discrimination based on financial status, place of residence, type of disease or time of seeking care.

In Ukraine, after the full-scale russian invasion, the most important task facing society is to protect the lives of children, civilians and the Ukrainian military. Therefore, all efforts should be aimed at creating conditions to preserve the life and health of the nation.

Health is vitality, inspiration and enjoyment of life. It is the ability to set goals and achieve them in order to realize one's full potential. Taking care of your health is relevant, modern and prestigious.

International Day of Sport for Development and Peace

The UN representatives introduced this holiday to draw public attention to the importance of sports and sports competitions for human development and peaceful relations. After all, sporting activity is a guarantee of health and well-being, a universal unifying factor for people of different nations, which helps to eliminate disputes and disagreements between different segments of the world's population.

Sport for Development and Peace is the key thesis of this international event, which defines the importance and necessity of this universal activity for each individual and society as a whole. A healthy lifestyle, physical and mental activity are the key to our prosperity and well-being.

Every year Ukraine takes an active part in celebrating this holiday, as it recognizes the unique power of sport to unite people around peace, friendship and development.

For Karazin University, physical culture and sports are an important part of the educational process, so much attention is paid to sports and recreational work with students, who can practice a sport chosen from a wide range of sports for free throughout their studies.

The solemn presentation of the attributes of the Honorary Doctor of Karazin University to the American historian and writer Timothy Snyder

Karazin University administration headed by Rector Tetiana Kahanovska and Vice-Rector Anatoliy Babichev met with American historian and writer Timothy Snyder and Minister of Education and Science of Ukraine Oksen Lisov in Kyiv.

During the meeting, Timothy Snyder was awarded the diploma of the Honorary Doctor of the University (doctor honoris causa), a gown and a sculpture "Per aspera ad astra!".

Mr Minister addressed Timothy Snyder: "We are very pleased to welcome you here and congratulate you on taking over the mantle of one of the leading universities in the country today. It is a distinguished university that is of great importance to our history. It is a great honour for me that this award ceremony is taking place within the walls of the Ministry."

Tetiana Kahanovska said: "Karazin University is now functioning in the unbreakable city of Kharkiv despite all the circumstances. We are standing, holding on and confident of our victory. And your lectures are what support and inspire us during the war. The university is about education and science, enlightenment and culture, so we aim not just to train professionals and specialists, but to educate individuals. We are very grateful that our university has an Honorary Doctor, who is an example for our students and inspires Ukrainian youth in such difficult times. After all, they are the future of our country."

Timothy Snyder thanked us for this meeting and promised to come back to Kharkiv and visit Karazin University next year.

The International Seminar "Plasma Electronics and New Acceleration Methods"

On September 5-6, the XVI International Seminar on Plasma Electronics and New Acceleration Methods took place at the National Scientific Center "Kharkiv Physics and Technology Institute." The seminar featured seven sections with a total of 57 presentations, including 24 research studies conducted with the participation of Karazin University staff. Participants of the seminar represented 18 local and 14 international universities and scientific centers, including institutions from the United Kingdom, Italy, Germany, Poland, the United States, and France. The peer-reviewed scientific articles have been published in the journal "Issues of Atomic Science and Technology," which is indexed in the Scopus scientific database.

Karazin University joined the work of the Scientific Committee of the European Contest of Scientific Projects in the Field of Controlled Fusion

On 18-19 September 2023, professors of the Education and Research Institute of the School of Physics and Technology took part in the work of the Scientific Committee (Jury) of the European Call for Scientific Projects in the field of Controlled Fusion. In particular, the Head of the Department of Applied Physics and Plasma Physics, Academician Ihor Harkusha worked in the Materials Science section, while Professor of the same department, Corresponding Member Ihor Hirka worked in the Technologies and Systems section.

The jury reviewed the results of their pre-evaluation of the funding requests and made recommendations for funding the best requests and improving the selection procedure in the future to the EUROfusion General Assembly. Out of fourteen requests, three projects were recommended for funding in each section.

- 16:00 | **ІНІ екології** | «Екологічна свідомість у кожному дні життя»

1/2

Adult Education Week is a series of captivating lectures with scientific and popular content aimed at a broad audience. Such events align with the 4th goal of the United Nations' Sustainable Development Goals, "Quality Education."

The first lecturer of the event was Nataliia Stiahlyk, Head of the Department of Information Technologies and Mathematical Modelling of the Karazin Banking Institute. She spoke about why education is important at any age, what digital competences are, and shared interactive resources for learning. Tamara Semenchenko, Associate Professor of the Department of Management, Business and Professional Communications, spoke about the basic rules for writing a quality CV and outlined what a work profile should look like online.

The main insight of the lecture: "Forget about your own ego - prove that it is you that the company needs." The lecture marathon was continued by Volodymyr Berest, Head of the Department of Molecular and Medical Biophysics. In his lecture, he spoke about the benefits of drinking water and beverages, which help people stay healthy and hydrated. The first day of the Adult Education Week was completed by Associate Professor of the Department of History of Ukraine Denys Zhuravlev with a lecture entitled "Cossacks and Tatars: Two Shores of the Great Steppe". The lecture was dedicated to the historical period of nomadic life of the Cossacks and Tatars.

The Central Scientific Library of Karazin University has Acquired a Substantial Collection of Books on Cultural Studies, Ethnology, and Folklore

The Central Scientific Library of Karazin University has received a large collection of books on cultural studies, ethnology and folklore from the Rylsky Institute of Art History, Folklore and Ethnology of the National Academy of Sciences of Ukraine.

The National Academy of Sciences of Ukraine, represented by its President and Chairman of the Supervisory Board of Karazin University, Academician Anatoliy Zagorodnyi, launched a charity event "National Academy of Sciences of Ukraine to Libraries" to support those research centres, schools of thought and scientific institutions that suffered the most.

Valentyna Sushko, a senior researcher at the Institute, said: "We are presenting a collection consisting of modern reprints of our luminaries: Pavlo Chubynsky, Filaret Kolessa, and Kateryna Hrushevska. This is the foundation of Ukrainian humanities, the treasure that should be used."

Anton Panteleimonov, Vice-Rector for Research and Teaching at Karazin University, thanked the University library for being replenished and strengthened by such a meaningful and thorough gift from the M. T. Rylsky Institute of Art History, Folklore and Ethnology of the National Academy of Sciences of Ukraine.

We are sincerely grateful for such a valuable gift on the eve of the All-Ukrainian Library Day!

Launch of the project "Centre for Postgraduate Medical Education of Karazin University"

Karazin University has developed one of the largest plans of educational activities in the country in the field of postgraduate medical education for experienced and novice specialists, interns and medical students of all specialities.

The Postgraduate Medical Education Centre includes 16 internship specialities, 43 secondary medical specialities, more than 300 events for the continuous professional development of medical professionals, the best simulation centre in the country with training equipment of world famous brands.

The Karazin Centre has the most powerful school of dentistry in the country with its own simulation and clinical training centres, international certification of training programmes, 3 international start-up medical projects, and more than 20 best clinical bases in the region. The educational initiatives of Karazin University for non-medical majors are the knowledge from professionals that every Ukrainian needs. The centre teaches how to provide emergency care, stop bleeding, perform cardiopulmonary resuscitation, maintain health and beauty, form a healthy lifestyle, perform medical manipulations, etc.

Goal 5. Gender equality
«Achieve gender equality and empower all women and girls».

International Day of Women and Girls in Science: the University congratulates

February 11 is the International Day of Women and Girls in Science. This memorable date was established by the United Nations and has been celebrated since 2016.

Representatives of Karazin University have always done a lot for the development of women's education, which primarily created a social basis for girls and women to enter science.

For example, the founder of the university, Vasyl Karazin, advocated in the early 19th century that education should be accessible to all, regardless of age or gender. And in 1842, he substantiated the importance of education for girls who belonged to the serfdom, the least socially protected stratum of the population. This idea was realized after his death.

Karazin University has become one of the flagships of women's education in our country and, together with other higher education institutions, has trained entire generations of women scientists and researchers. After all, it was here that women were granted the right to receive education for the first time in Ukraine at that time. In particular, historian Oleksandra Yefymenko became the first woman to receive an honorary doctorate. She was awarded this title by the Academic Council of Kharkiv University in 1910.

The working group meeting on the implementation of the project "Gender Education for Foreign Students"

Karazin University hosted a meeting of the working group on the project "Gender Education for International Students", which has been implemented since February 2023 by the NGO La Strada-Ukraine in cooperation with V. N. Karazin Kharkiv National University and the Government Commissioner for Gender Policy Kateryna Levchenko.

The project aims to introduce gender approaches in the training of students from Africa studying in Ukraine, using the example of V. N. Karazin Kharkiv National University (with the support of UNESCO).

According to the project plan, the university is conducting a sociological study on the availability of gender competencies among international students from Africa and teachers of international students as key stakeholders in the Kharkiv region. It is planned to develop a teaching and methodological manual on various aspects of gender issues, organize and conduct trainings for teachers and students at Karazin University, as well as develop and implement a course for teachers working with international students to develop their own gender competencies.

Goal 6. Clean Water and Sanitation.
**«Ensure availability and sustainable
management of water and sanitation for all».**

World Water Day

March 22 marks the thirtieth consecutive year of World Water Day. This international day of remembrance was established in 1993 by the UN General Assembly as a reminder of the importance of water for sustainable economic development and social well-being. On this day, events are held around the world to raise awareness of the general public about the need to preserve clean water resources and their rational development.

Many representatives of Kharkiv University have been studying the water resources of our region at different times, taking care of their conservation and careful use. For example, the founder of the University Vasyl Karazin wrote about the need to preserve clean and full-flowing rivers, which is primarily directly affected by the preservation of forests. He also developed plans to clean up riverbeds in Kharkiv and studied the healing properties of mineral waters from springs in the Orel River basin.

Representatives of Kharkiv University were actively engaged in the study of water resources in the following years. In particular, in 1862, a special commission of Karazin University's School of Medicine concluded that Berezhivka mineral waters were similar in chemical composition to the water of the Spa spring (in Belgium) and could be used for medicinal purposes, which marked the beginning of the famous balneological resort.

World Meteorological Day

March 23 is World Meteorological Day. It was established in 1961 at the initiative of the World Meteorological Organization, which operates under the auspices of the United Nations.

Its main goal is to demonstrate the significant contribution of national meteorological and hydrological services to the safety and well-being of society. Each year, a special theme is chosen for World Meteorological Day related to weather, climate and water research. In 2023, the theme is "Change Yourself, Change the Future," which encourages people to take action in their own lives to change the way they use and consume water and manage water resources.

Vasyl Karazin, the founder of Kharkiv University, was one of the first to advocate the importance of meteorology as a science and applied field of activity.

In 1810, he was the first in the world to express the idea of the need to create a wide network of meteorological stations for comprehensive weather observations. The scientist wrote: "These observations will be the most important service for meteorology and will make it an exact science, that is, the science of calculating and predicting the weather in a certain place and time." He organized the first meteorological station in Ukraine on his estate in the village of Kruchykh (in the modern Bohodukhiv district of Kharkiv region) and conducted research there for several decades.

Today, meteorological issues are studied at the School of Geology, Geography, Recreation and Tourism of Karazin University.

On July 6, 2023, the EU4 Environment Water and Data program held a workshop on "Nature-based solutions". The main objective of the workshop is to promote a deeper understanding and adoption of nature-based solutions in the Eastern Partnership countries. This understanding is essential for integrating these solutions into the action programs of River Basin Management Plans. Currently, such plans are being developed in Armenia (Northern River Basin), Georgia (Enguri and Rioni River Basins), and Ukraine (Dnipro River Basin). The seminar brought together more than 100 participants, including experts from Armenia, Azerbaijan, Georgia, Moldova and Ukraine.

The Karazin Education and Research Institute of Ecology was represented by the Acting Head of the Department of Ecology and Environmental Management Andrii Achasov with a report "Contour and melioration agriculture in Ukraine".

Karazin University students participate in "Euratom Research in Action and Opportunities for Europe: Strategic Autonomy of the EU and Energy Systems of the Future"

On April 4, 2023, the European Parliament hosted a conference "Euratom Research in Action and Opportunities for Europe: EU Strategic Autonomy and Future Energy Systems" in Brussels (Belgium).

The event was chaired by the European Commissioner for Innovation, Research, Culture, Education and Youth, Mariya Gabriel, and Director General of the EU Directorate-General for Research and Innovation, Marc Lemaitre.

The conference was also attended by the Ukrainian delegation, which included, in particular, Ihor Harkusha, Head of the Department of Applied Physics and Plasma Physics at the Education and Research Institute of School of Physics and Technology, Academician of the National Academy of Sciences of Ukraine, Ihor Hirka, Director of the Education and Research Institute of School of Physics and Technology, Corresponding Member of the National Academy of Sciences of Ukraine, and graduates of the Education and Research Institute of School of Physics and Technology Serhii Fomin, Dmytro Burdeinyi, and Hanna Skrypka.

The conference focused on the development of small modular reactors, including licensing, safety and non-proliferation, supervision of power grids, fuel extraction and disposal. The main thesis is that SMRs (small modular reactors) do not replace VVER-1000s (water-water power reactors), but complement them. There are already six versions of SMRs in Europe. They should be economically viable, i.e. easy to operate and cheap.

Solar power plants are a step towards sustainable development and energy independence: the university will provide itself with energy

Hostile attacks on the city's energy infrastructure have become a new challenge for the Kharkiv Karazin University Foundation. A new task was defined - to find a way to ensure the university's energy independence from the centralized power grid.

Modern society is increasingly supporting the use of renewable energy sources. Solar energy is one of the most popular options. To this end, funds have been raised for the construction of solar power plants that will generate the optimal amount of energy.

It is important to note that the project contributes to achieving one of the main goals of the UN Sustainable Development Goals - affordable and clean energy. Solar power plants can reduce emissions of harmful substances and carbon dioxide, which will help improve air quality and conserve natural resources. In addition, dependence on traditional energy sources will be eliminated.

World Day for Safety and Health at Work

On April 28, Ukraine and more than a hundred countries around the world celebrate World Day for Safety and Health at Work.

The right to work in safe and healthy conditions is enshrined in the Constitution of Ukraine. The World Day for Safety and Health at Work in Ukraine was established to draw public attention to occupational safety and health issues. After all, the value of the results of any labor activity cannot be higher than the value of an employee's health and life.

At the initiative of the International Labor Organization, the World Day for Safety and Health at Work in 2023 is being held under the motto "A Safe and Healthy Working Environment as a Fundamental Principle and Right at Work".

Since the beginning of the full-scale Russian invasion of Ukraine, the issue of occupational safety has taken on new importance. Thousands of businesses continue to operate despite additional daily risks and challenges, as organizing occupational safety and health under martial law is a daunting task.

Karazin University has faced many challenges, but the university continues to operate. All activities related to occupational safety and health are carried out in full, including certification of workplaces, scheduled training of employees, medical examinations of university employees working in hazardous conditions, and timely recharging of fire extinguishers.

Day of Inventors and Innovators

Every year on the third Saturday of September, Ukraine celebrates the Day of Inventor and Innovator. Vasyl Karazin, the founder of Karazin University, was one of the first Ukrainian inventors. He suggested new ways of drying vegetables, fruits and meat, invented a faster way of producing nitrate, and improved a number of agricultural implements. These and other initiatives of Vasyl Karazin contributed to the fight against hunger. This task is still very important for the modern world.

Representatives of Karazin University have also always been engaged in the invention and improvement of equipment and technologies. Today, Karazin University holds more than 300 titles of protection for intellectual property rights. We congratulate all inventors and innovators on their professional holiday and wish them creative inspiration and innovative ideas!

Karazin University's main building turns 60

The main university building always attracts the attention of Kharkiv citizens and guests of our city. For a long time, it was the tallest secular building in Kharkiv. Built in 1929-1932 in Kharkiv, it became known as "the House of Projects".

The constructivist skyscraper of the first third of the 20th century was heavily damaged during the Second World War and was transferred to the university in 1950. It took thirteen years to rebuild it. On 7 September 1963, the main building was inaugurated. The university received 61,000 square metres of space.

The architects of the building were Serhii Serafimov and Mariia Zandberg-Serafimova. The building was rebuilt by university staff and students under the guidance of architects and designers Veniamin Kostenko, Alexander Kasyanov, Vladimir Lipkin and others.

The main building of the university is a historical, cultural and architectural monument of local importance. It is associated with the activities of prominent scientists of the 20th and 21st centuries: astronomer Mykola Barabashov and mathematician Oleksii Pogorelov, physicist Ilya Lifshits and psychologist Petro Zinchenko, sociologist Olena Yakuba and archaeologist Borys Shramko, and many others.

The main building of Karazin University is a jewel of the city, national science and education. This year, it has welcomed thousands of new applicants, masters and postgraduate students. New generations continue the traditions of Karazin University.

On June 17, 2023, Kharkiv Green Urban Fest 2023 was held at the Yermilov Center of Karazin University as part of the international research project Fusilli (Fostering the Urban Food System Transformation through Innovative Living Labs Implementation). This project has received funding from the European Union's Horizon 2020 research and innovation program under grant agreement №101000717.

The partners of the event, "Mom, Plant a Tree!", told the festival participants about the initiative "Plant a Tree - Mine Ukraine", because every fifth tree planted will mine 1 square meter of territory in Ukraine. Karazin University School of Sociology, together with its students and alumni, joined the initiative and planted 10 trees in Kharkiv Region.

World Population Day

July 11 marks World Population Day, an annual event aimed at raising public awareness of the problems of the world's population. Among them are family planning, gender equality, poverty alleviation, maternal and child health, human rights, and other equally important issues that are addressed by the global Sustainable Development Goals.

World Population Day was established by the United Nations in 1989 to commemorate July 11, 1987, the Day of Five Billion. It is believed that it was then that the world's population reached 5 billion people. Since then, the number of people on Earth has exceeded 8 billion. Accordingly, population problems have become even more acute and urgent.

Representatives of Karazin University have always made considerable efforts to study and solve various demographic aspects. Thus, Vasyl Karazin, the founder of the University, was the first in the national science to raise and partially solve the problem of studying the natural population growth in different social groups. In particular, at the beginning of the nineteenth century, he proved on the basis of materials from Sloboda Ukraine that the mortality rate of serfs was the highest among all other social classes.

Kharkiv Green Urban Fest 2023

On June 17, 2023, Kharkiv Green Urban Fest 2023 was held at the Yermilov Center of Karazin University as part of the international research project Fusilli (Fostering the Urban Food System Transformation through Innovative Living Labs Implementation). This project has received funding from the European Union's Horizon 2020 research and innovation program under grant agreement №101000717.

The invited partners of the festival, Zmiiv Paper Mill, demonstrated the full cycle of Tetra Pak packaging recycling in Ukraine. It is interesting to note that this paper mill can process up to 15 thousand tons of products per year, which makes it a powerful processing enterprise in the region.

And our partners 3.14BAN, founded by Kateryna Uvarova, a graduate of the faculty, is a brand of modern culture of conscious consumption that gives new life to old banners and produces accessories that are useful in everyday life. They demonstrated their products and everyone had the opportunity to buy them, because they are environmentally friendly, convenient and conscious.

International Day of Forests

On March 21, the world celebrates the International Day of Forests. This memorable date was introduced by the UN General Assembly on November 28, 2012, and its first celebration took place in 2013. The main purpose of this memorable day is to remind humanity of the need to protect and preserve the forest resources of our planet.

Today, about 30% of the world's land is covered by forests, and the plants and animals that live in them account for up to 80% of the world's biodiversity. Forests play a key role in stabilizing the Earth's climate, providing food, water and medicine to billions of people. The 13th Sustainable Development Goal of the United Nations ("Mitigating the effects of climate change") is linked to forest conservation.

Vasyl Karazin, the founder of Kharkiv University and a prominent Ukrainian naturalist, was concerned about the preservation of forests in the first half of the nineteenth century. In his writings, he proved the favorable impact of forests on the climate and water balance of rivers, called for the protection of forests from ill-considered deforestation, pointed out the need to plant trees in beams and ravines, and to reforest sandy areas unsuitable for agriculture, thus organically combining environmental issues with economic ones. The educator also became one of the pioneers of steppe reforestation and in his writings gave advice on the optimal selection of tree crops, soil selection, etc.

World Oceans Day: a thought-provoking holiday

<https://karazin.ua/en/news/vsesvitnii-den-okeaniv-sviato-shcho-nbsp-sponukaie-zamysly/>

June 8, 2023 is World Oceans Day. The holiday was launched at the initiative of the Canadian International Center for Ocean Development (ICOD) and the Ocean Institute of Canada (OIC) and is one of the UN's International Days. However, on this holiday, Ukrainians are experiencing a large-scale environmental and man-made disaster, the consequences of which will be felt for a long time.

Ukraine, like other UN member states, has joined the global process of ensuring sustainable development. The implementation of the Sustainable Development Goals is a priority for a number of institutions, including educational institutions. However, for the second year in a row, the aggressor has been causing irreparable damage to Ukraine's sustainable development in front of the world.

History shows, and we have witnessed, that tolerating the aggressor's actions leads to terrible consequences. That is why today is the best time to think about the depths of the ocean of patience of Ukrainians who have lost their homes. About those unfortunate animals who died because of the aggressor's actions. Today is the best time to call a spade a spade.

Geologist's Day: the University celebrates

On the first Sunday of April, Ukraine celebrates Geologist's Day. This professional holiday of geology, geodesy and cartography was introduced in 1995 in accordance with the Decree of the President of Ukraine. At the same time, this day is also the Day of the School of Geology, Geography, Recreation and Tourism of Karazin University.

Karazin University has a long tradition in the field of earth sciences. Even its founder Vasyi Karazin collected and classified fossil specimens and tried to investigate their origin. Over many subsequent decades, powerful scientific schools were formed at the university: paleontological, mineralogical and petrographic, lithological, physical geography and cartography, socio-economic geography and regional studies.

<https://karazin.ua/en/news/den-heoloha-universytet-vidznachaie/>

The results of scientific research and practical activities of the faculty members and graduates are not only of great theoretical but also of particular practical importance. After all, the Sustainable Development Goals set by the United Nations, which Karazin University shares, include the conservation, restoration and sustainable use of terrestrial ecosystems, the fight against desertification, stopping land degradation and ensuring their restoration.

International Mother Earth Day

This date was first celebrated on April 22, 2010, at the initiative of the UN General Assembly. However, the history of the holiday began much earlier.

In 1971, one of the US senators, Gaylord Nelson, proposed the idea of celebrating an annual Earth Week, as at that time the US celebrated Arbor Day on April 22, and in 2010, the International Mother Earth Day was officially celebrated for the first time. The UN resolution states that the Earth and its ecosystems are our home and provide life for humanity.

The International Mother Earth Day reminds each of us that the planet and its ecosystems ensure our existence, and provides an opportunity to raise public awareness around the world about the issues that affect the well-being of our planet and all living things it supports.

On this occasion, Ukrainian communities abroad and foreigners from different parts of the world will hold the #StopEcocideUkraine campaign. On April 21-23, residents of all six continents of the planet: Eurasia, North and South America, Africa, Australia, and Ukrainian polar explorers from the Academician Vernadsky station in Antarctica, including Karazin University graduates, will form a human chain of unity to draw attention to the environmental crimes that Russia is committing during its war against Ukraine.

Karazin University, in collaboration with the University of York, participated in a seminar as part of the Kharkiv-York Partnership Towards a Zero Pollution Environment in Post-War Ukraine project

On August 29-30, 2023, a seminar was held at the University of York in the UK as part of the Kharkiv-York Partnership Towards a Zero Pollution Environment in Post-War Ukraine project, which was attended by 14 PhD students and Karazin University professors.

The seminar was attended by the Vice-Chancellor of the University of York, Professor Abrose Field, Director of the Centre for New Crops at the University of York, Professor Neil Bruce, Project Manager from the University of York, Professor Alistair Boxall, and researchers from the Conflict and Environment Observatory, Anna McKeon and Johan Darbyshire. Karazin University was represented by Vice-Rector for Research and Teaching, Professor Borys Samorodov, Acting Head of the Department of Ecology and Environmental Management, Professor Andrii Achasov, and Director of the Education and Research Institute of Ecology, Associate Professor Hanna Titenko.

The seminar discussed ways to achieve an ecologically clean environment in post-war Ukraine, including the creation of transgenic plants for phytoremediation of explosives contamination. They discussed the possibilities of conducting joint research and training with the University of York to find ways to combat environmental pollution, as well as the specifics of assessing and restoring Ukrainian soils that were contaminated as a result of military operations. They also focused on prioritizing and finding funding for future joint projects.

Finalizing the project "Recording the damage caused to the natural complexes of the Kharkiv region as a result of the war"

The experts of the Karazin Education and Research Institute of Ecology, as part of the working group of the NGO Environmental Geographic Information Systems of Ukraine, have completed their work on the project "Recording the damage caused to natural complexes of the Kharkiv region as a result of the war". The research was conducted within the framework of the Initiative for the Development of Environmental Policy and Advocacy in Ukraine, implemented by the International Renaissance Foundation with financial support from Sweden.

The territory of the Kharkiv region, where active hostilities were conducted from February 24, 2022 to October 15, 2022, was surveyed. The total area surveyed was 21,063 km².

In the course of the work, approximately more than 17,000 satellite images were examined. Based on the results of satellite image interpretation, more than 61 thousand craters formed as a result of ammunition hits were recorded. The results of the work are presented on the open geospatial data portal EcoSpace.

World Day for Cultural Diversity for Dialogue and Development

On May 21, 2023, many countries celebrate the World Day for Cultural Diversity for Dialogue and Development.

The holiday was established by a resolution of the UN General Assembly and first celebrated in 2003. It gives us the opportunity to realize the depth and diversity of national culture not only in our country but also in other countries of the world, to understand the importance of cultural exchange and preservation of customs, traditions and heritage.

Cultural diversity is a driving force for development not only in terms of economic growth, but also for a full intellectual, emotional, moral and spiritual life. It is a valuable asset that is a prerequisite for achieving sustainable development of society.

Karazin University offers ample opportunities for development and dialogue between representatives of different scientific disciplines, nationalities, countries, and research areas. We strive to make the pluralism of cultures, through the establishment of a dialogue between them, our common achievement. <https://karazin.ua/en/news/vsesvitnii-den-kulturnoho-riznomanittia-v-nbsp-imia-dialohu/>

Week of Independence at Karazin University

Today, more than ever, we understand the importance of talking about history, as our country defends its independence with arms in hand. According to the organisers of the event, as part of Independence Week, the lecturers and participants commemorate our predecessors who made a significant contribution to the history of Ukraine, particularly in the Kharkiv region.

Maryna Hryhorieva, a historian, translator, curator of the excursion project "Discover Karazin University", head of the international ratings department of the Karazin University Public Relations Centre, and an expert in the history of university education, museum studies, and translation studies, started the week's equator. The lecturer spoke on the topic "Only to fight is to live": Reflections on the University's Mission in Times of War".

During the lecture, it was said that the war for freedom has always been fought in university classrooms, and the university has always been and remains a carrier of various scientific, cultural ideas and European democratic values.

Now, during a full-scale war, the idea of a university is much broader than "just teaching". The university must shape the policy of memory so that each of the fallen soldiers remains in history. The Week of independence ended with two events at the University Museum of Archaeology. Kostiantyn Pelyashenko gave the guests a tour of the Archaeological Research of Karazin University Scientists in the Period of Independence of Ukraine. <https://karazin.ua/en/news/tyzhden-nezalezhnosti-v-nbsp-karazinskomu-universyteti/>

International Day of Peace

On 21 September, the world celebrates the Day of Peace, established by a UN General Assembly resolution in 1982.

On 21 September 2023, Karazinites in Kharkiv woke up due to the explosions. Due to the missiles fired by Russia. In the "morning of peace", Ukrainians in Kyiv, Khmelnytskyi, Rivne, Cherkasy, and Lviv woke up due to the explosions as well.

3501 days have passed since the annexation of Crimea. 3501 days without peace for Ukraine. While the whole world celebrates the Day of Peace, Ukraine has been fighting for this peace every second for 9 years now, not only for itself but for the whole Europe. The price of peace is too high. On this day, the Karazin community honours each and every one of those who stand in defence of Ukraine. Thank you for these titanic efforts. Peace in the world is possible when no one stands aside in the struggle for justice and freedom, when the world finally chooses the side of light.

Training of biologists at the representative office of Karazin University in Munich (Germany)

Karazin University continues its work in Kharkiv online. However, the university is steadfast in accepting challenges and is always looking for opportunities to keep up with the times and provide quality education by engaging its partners around the world. That is why students now have the opportunity to study offline and do internships in Munich (Germany), where Karazin University has opened a representative office. Students of the School of Biology can study there, among other things.

These students study in a mixed (on-site and distance) format. Full-time classes (practical and laboratory) are held in Munich.

In particular, from February 27 to March 3, 2023, Nataliia Leonova, Associate Professor of the Department of Chemical Metrology at the University's School of Chemistry, successfully conducted laboratory classes in Analytical Chemistry for students of the School of Biology (groups B113, B114) at the Ludwig-Maximilians-Universität in Munich.

Resilience in times of war: Karazin University is a member of the project Working towards resilient societies in the EaP: challenges and opportunities for the policy beyond 2020

On 18 March, at the initiative of the Department of Political Science of the School of Philosophy, an interdisciplinary expert meeting was held within the framework of the project Working towards resilient societies in the EaP: Challenges and opportunities for the policy beyond 2020, an interdisciplinary expert meeting was held with the participation of Karazin University.

The participants of the expert meeting assessed the challenges faced by various sectors of Ukraine in the context of the war and how Ukrainian society is coping with this shocking event. According to the experts, digitalisation and organisational scaling of public and private sector institutions are the key tools for ensuring resilience.

The project is being implemented with the assistance of the European Union and the participation of such higher education institutions as ADA University (Azerbaijan), Ivane Javakhishvili Tbilisi State University (Georgia), and the University of Warwick (UK). This project aims to develop recommendations for the European Commission to implement the concept of resilience in the Eastern Partnership countries.

All-Ukrainian student media forum StuDigital 3.0

On 27-28 May, Kharkiv hosted the All-Ukrainian Student Media Forum StuDigital 3.0.

StuDigital 3.0 was the third event within the StuDigital project, which focuses on bringing together student media from universities in different cities of Ukraine. The forum was created on the initiative of the Karazin University Student Council with the media support of unk.blog.

StuDigital allows participants to gain useful knowledge in such areas as SMM, marketing, copywriting, photo, video, reels, strategies, etc., as well as provides opportunities for networking and experience exchange. The forum aims to introduce participants to new technologies and methods of working in the media and teach them how to work with them. The main idea of StuDigital is to create a Ukrainian media community.

Karazin scholars took part in the symposium "The most documented war"

On 1-3 June 2023, Lviv hosted a symposium of documentary and archival projects entitled The Most Documented War.

The event was organised by the Center for Urban History (Lviv), the Centre for Governance and Culture in Europe at the University of St. Gallen, and the Institute for the Humanities (Vienna).

Karazin University was represented at the symposium by Maryna Hryhorieva, Head of the International Ratings Department of the Public Relations Centre, Roman Liubavskyy, Deputy Dean of the School of History for Research, Yevhen Zakharchenko, Head of the Historical Informatics Laboratory of the School of History, and Olha Krasko, Senior Researcher at the University History Museum.

The aim of the event was to create a space for reflection on how the staggering scale of the documentation initiatives affects our perception of the course of the war, and how this will affect research and our society in general after the war is over. The programme of the symposium was organised around themes that reflect the diverse aims of war documentation and address issues and challenges relevant to the respective disciplines.

On August 29-30, 2023, a seminar was held at the University of York in the UK as part of the Kharkiv-York Partnership Towards a Zero Pollution Environment in Post-War Ukraine project, which was attended by 14 PhD students and Karazin University professors.

The seminar was attended by the Vice-Chancellor of the University of York, Professor Abrose Field, Director of the Centre for New Crops at the University of York, Professor Neil Bruce, Project Manager from the University of York, Professor Alistair Boxall, and researchers from the Conflict and Environment Observatory, Anna McKeon and Johan Darbyshire. Karazin University was represented by Vice-Rector for Research and Teaching, Professor Borys Samorodov, Acting Head of the Department of Ecology and Environmental Management, Professor Andrii Achasov, and Director of the Education and Research Institute of Ecology, Associate Professor Hanna Titenko.

The seminar discussed ways to achieve an ecologically clean environment in post-war Ukraine, including the creation of transgenic plants for phytoremediation of explosives contamination. They discussed the possibilities of conducting joint research and training with the University of York to find ways to combat environmental pollution, as well as the specifics of assessing and restoring Ukrainian soils that were contaminated as a result of military operations. They also focused on prioritizing and finding funding for future joint projects.

Professor Igor Hirka joined the Polish Physical Society Congress

The image shows a screenshot of a presentation slide on the left and a video conference interface on the right. The slide is titled "Scopus mandate and authority" and contains two main sections: "Scopus is committed to creating a representative, curated dataset of scholarly content:" and "Scopus cannot interfere with editorial autonomy of journals:". The first section lists: "Overall journal selection based on journal-level data and performance", "Monitoring and deselection of titles that are predatory or below standards". The second section lists: "Editorial decisions on quality of individual articles and conferences", "(Scientific) content of the articles and abstracts included in the database", "Plagiarism and other publication malpractice of individual articles", "Authorship of the papers". Below the text is a pie chart titled "Journals – Publishers indexed in Scopus" with a legend: Elsevier (9,0), Springer Nature (7,9), Taylor & Francis (7,8), Wiley-Blackwell (5,1), SAGE (2,4), Wolters Kluwer Health (1,5), and an unlabeled segment (1,0). A note at the bottom of the slide reads: "Note: If publication malpractice is occurring knowingly and on a structural basis without policy to address and prevent such cases, Scopus will flag, re-evaluate and potentially discontinue titles." The video conference interface shows a meeting room with participants, a name tag for "Marcin Marciniak", a profile icon for "Wiecewski, Bartłomiej (ELS-WRO)", and a page indicator "1/3".

On September 2nd, Professor Igor Hirka from the Education and Scientific Institute of the School of Physics and Technology participated in the Polish Physical Society Congress at the request of the Coordination Council of the Ukrainian Physical Society, where he serves as vice president. During his presentation, Igor Hirka mentioned Count Severin Potocki, who was the first curator of Karazin University, the first Marshal of Poland Józef Piłsudski, who studied at the School of Medicine, and the artist Henryk Semiradsky, who graduated from the School of Physics and Mathematics.

Professor Hirka also informed about the destruction of university buildings and the wartime losses among students, staff, and graduates of Karazin University. At the end of the event, Igor Hirka expressed his gratitude to the Polish society. He highlighted that today, over two million Ukrainians reside in Poland, and he thanked the entire democratic community for their support of Ukraine. He also reminded everyone about the possibility of helping the university through the Kharkiv Karazin University Foundation.

Karazin University Delegates Visit International Summer Symposium "Ukrainian Studies in Sweden. Methodological Issues and Perspectives"

From 14 to 17 August 2023, Södertörn University (Stockholm, Sweden) hosted an international summer symposium "Ukrainian Studies in Sweden. Methodological Problems and Prospects" for Ukrainian and Swedish researchers in the humanities. 15 Ukrainian and 7 Swedish researchers worked in six sections and several discussions. Karazin University was represented by two scholars in the fields of history and philology.

The event was attended by Olena Matushek, Head of the Department of History of Ukrainian Literature, Professor, and Nataliia Aksionova, Associate Professor of the Department of Tourism Business and Country Studies. Accordingly, they delivered presentations on "The Image of Ivan Mazepa in the Literature of the Ukrainian Baroque" and "Ethnological Seminars in the Format of a Folk Festival: Achievements and Prospects." The event was aimed at discussing issues of Ukrainian research in Sweden and networking in Ukrainian-Swedish studies. The participants shared their research experience, held interesting discussions, and got acquainted with the work of the Centre for Baltic and East European Studies, which has a printed publication *Baltic Worlds*, which informs the world about the nature, causes, course and consequences of Russian aggression in each issue. Ukrainian researchers from 13 universities were impressed by the fact that the University of Södertörn raises Ukrainian flags alongside the flags of Sweden every day as a sign of support for Ukraine. This action will continue until the people of Ukraine win.

The participants of the symposium are sincerely grateful to the communities of the University of Södertörn and Uppsala University and personally to each member of the organising committee for holding this wonderful event, and to all colleagues for meaningful and interesting communication.
