CONTENT

List of acronyms	7
Introduction	9
1. Morpho-functional peculiarities of the respiratory system in children	10
1.1. The development of the respiratory system	10
1.2. Gas exchange during intrauterine period and at birth	11
1.3. Anatomical features of the respiratory system in children	13
1.4. Questions for self-control.....	15
2. Methods of examination of the respiratory system in children	17
2.1. General and specific complaints	17
2.2. Anamnesis collection data.....	18
2.3. Objective examination of the respiratory system in children	19
2.3.1. Inspection.....	19
2.3.2. Assessment of breathing	21
2.3.3. Palpation of chest.....	23
2.3.4. Percussion of lungs	24
2.3.5. Auscultation of lungs.....	27
2.4. Paraclinical methods of investigation of the respiratory system in children	29
2.4.1. Instrumental investigations.....	29
2.4.2. Laboratory investigations	33
2.5. Questions for self-control.....	34
3. The most common acute upper and lower respiratory tract diseases in children	36
3.1. Common colds.....	36
3.1.1. Etiology and pathogenesis of common colds	36
3.1.2. Clinical manifestation and diagnosis of common colds.....	37
3.1.3. Treatment and prevention of common colds	37
3.2. Croup	38
3.2.1. Etiology and pathogenesis of croup	38
3.2.2. Clinical manifestation and diagnosis of croup	39
3.2.3. Treatment of croup	40
3.3. Epiglottitis	41
3.3.1. Etiology and pathogenesis of epiglottitis	41

3.3.2. Clinical manifestation and diagnosis of epiglottitis	42
3.3.3. Treatment of epiglottitis	43
3.4. Tonsillitis	44
3.4.1. Etiology of tonsillitis	44
3.4.2. Clinical manifestation and diagnosis of tonsillitis	45
3.4.3. Treatment of tonsillitis.....	46
3.5. Acute bronchitis.....	47
3.5.1. Etiology and pathogenesis of acute bronchitis	47
3.5.2. Classification of bronchitis	47
3.5.3. Clinical manifestation and diagnosis of acute bronchitis	48
3.6. Bronchiolitis	50
3.6.1. Etiology and pathogenesis of bronchiolitis	50
3.6.2. Clinical manifestation and diagnosis of bronchiolitis	50
3.6.3. Treatment of bronchiolitis	52
3.7. Aspiration by a foreign body.....	53
3.7.1. Diagnosis of aspiration by a foreign body.....	54
3.7.2. Treatment of aspiration by a foreign body	54
3.8. Pneumonia	55
3.8.1. Etiology of pneumonia	55
3.8.2. Pathogenesis of pneumonia	57
3.8.3. Classification of pneumonias according to WHO.....	57
3.8.4. Clinical manifestation of pneumonias	58
3.8.4.1. Features of clinical manifestation in children of different ages.....	58
3.8.5. Diagnosis of pneumonias.....	59
3.8.6. Treatment of pneumonias	61
3.8.7. Complications of pneumonia.....	66
3.8.7.1. Pleural effusion	66
3.8.7.2. Lungs abscess.....	66
3.8.7.3. Pneumothorax.....	67
3.8.8. Prevention of pneumonias	67
3.9. Questions for self-control.....	68
4. Bronchial asthma.....	70
4.1. Risk factors of bronchial asthma.....	70
4.2. Pathogenesis of bronchial asthma	70
4.3. Bronchial asthma in children aged from 6 to 18.....	71
4.3.1. Main clinical phenotypes of bronchial asthma in children aged from 6 to 18.....	71
4.3.2. Clinical manifestation and diagnosis of bronchial asthma in children aged from 6 to 18.....	72

4.4. Treatment of bronchial asthma.....	74
4.4.1. Initial treatment of bronchial asthma in children aged from 6 to 11.....	76
4.4.2. Assessment of bronchial asthma control and personalized approach to bronchial asthma in children aged from 6 to 18.....	77
4.4.3. Treatment of bronchial asthma exacerbations in children aged from 6 to 18.....	79
4.5. Peculiarities of the course of bronchial asthma in children under the age of 5.....	80
4.5.1. Clinical manifestation of bronchial asthma in children under the age of 5.....	80
4.5.2. Diagnosis and differential diagnosis of bronchial asthma in children under the age of 5.....	81
4.5.3. Step-by-step therapy of bronchial asthma in children under the age of 5.....	82
4.5.4. Assessment of bronchial asthma control by personalized treatment in children under the age of 5.....	83
4.5.5. Treatment of bronchial asthma exacerbations in children under the age of 5.....	84
4.6. Questions for self-control.....	85
5. Chronic bronchopulmonary diseases in children.....	86
5.1. Chronic bronchitis.....	87
5.1.1. Etiology and pathogenesis of chronic bronchitis.....	87
5.1.2. Clinical manifestation and diagnosis of chronic bronchitis.....	88
5.1.3. Basic principles of chronic bronchitis treatment.....	89
5.2. Bronchiectasis.....	89
5.2.1. Clinical manifestation of bronchiectasis diseases.....	90
5.2.2. Diagnosis of bronchiectasis diseases.....	90
5.2.3. Bronchiectasis disease treatment.....	91
5.3. Cystic fibrosis.....	91
5.3.1. Etiology and pathogenesis of cystic fibrosis.....	91
5.3.2. Clinical manifestations of cystic fibrosis.....	92
5.3.3. Diagnosis of cystic fibrosis.....	93
5.3.4. Cystic fibrosis treatment.....	93
5.4. Pulmonary hemosiderosis.....	94
5.4.1. Clinical manifestation of different forms of pulmonary hemosiderosis.....	94
5.4.2. Diagnosis of pulmonary hemosiderosis.....	95
5.4.3. Treatment of pulmonary hemosiderosis.....	95

5.5. Idiopathic fibrosing alveolitis.....	96
5.5.1. Clinical manifestation of idiopathic fibrosing alveolitis	96
5.5.2. Diagnosis of idiopathic fibrosing alveolitis.....	97
5.5.3. Treatment of idiopathic fibrosing alveolitis	97
5.6. Congenital abnormalities of the respiratory system.....	98
5.6.1. Congenital malformations of the trachea and bronchi	98
5.6.1.1. Tracheobronchomegaly	98
5.6.1.2. Tracheomalacia	99
5.6.1.3. Tracheal stenosis	99
5.6.1.4. Williams-Campbell syndrome	100
5.6.2. Congenital malformation of the lungs	101
5.6.2.1. Lung agenesis and hypoplasia.....	101
5.6.2.2. Congenital lobar emphysema.....	102
5.6.2.3. Congenital cystic adenomatoid malformations.....	103
5.6.2.4. Pulmonary sequestration	105
5.6.3. Kartagener's syndrome	105
5.7. Questions for self-control.....	107
6. Sorting of patients. The concept of pediatric acute respiratory distress syndrome (PARDS)	109
6.1. Sorting	109
6.2. Pediatric acute respiratory distress syndrome (PARDS)	112
6.3. Questions for self-control.....	116
7. Reference	118
